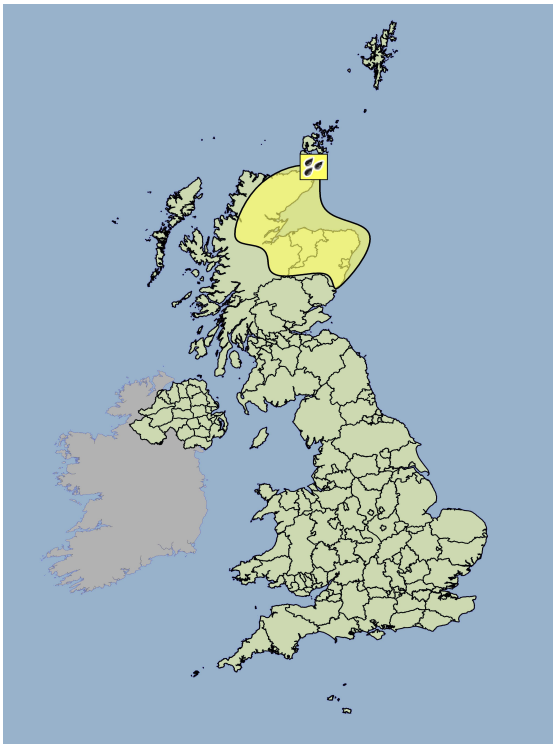
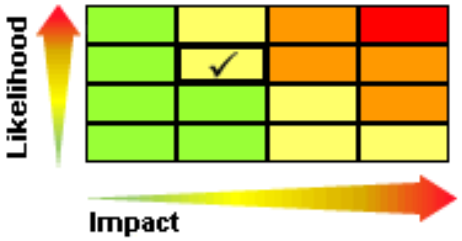
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal zone has become slow-moving across the north and northeast of Scotland through Tuesday. This will bring further rain, often heavy and persistent, overnight. The rain may continue into the early part of Wednesday although peak intensities are expected to reduce by this time.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **15:45 on Tue, 07th Oct 2014** until **12:00 on Wed, 08th Oct 2014**

Periods of heavy rain will continue across northern and northeastern Scotland through Tuesday night and into Wednesday morning. Further rainfall totals of 20-25 mm are expected with around 40 mm around some hillier districts, especially Easter Ross across the Great Glen into Moray and Speyside. Gale force winds are also expected initially across the north of these regions (please see separate wind warning).

This is an update to the warning originally issued on Monday, extending its duration into Wednesday.

The public should be aware that driving conditions will become hazardous with localised flooding and standing water.
